

# Proceedings of the annual meeting of the French Society of Astronomy & Astrophysics

Paris, June 3-6, 2014

**SF2A**  
SOCIÉTÉ FRANÇAISE  
D'ASTRONOMIE &  
D'ASTROPHYSIQUE

**AIM**

<http://2014.sf2a.eu>

## SEMAINE DE L'ASTROPHYSIQUE

**Du 3 au 6 juin 2014**

**PARIS**  
**Université Paris Diderot**  
« Halle aux farines »

### Journées de la SF2A

communes avec la Société Portugaise d'Astronomie  
Sessions plénières  
Ateliers SF2A

#### Evènements

Prix jeune chercheur  
Prix jeune enseignant-chercheur  
Prix de thèse  
Prix scolaire « Découvrir l'Univers »  
Conférences grand public

#### SOC

C. Reylé (présidente SF2A)  
H. Wozniak (vice-président SF2A)  
D. Burgarella (vice-président UAI-SF2A)  
J. Ballet  
S. Basa  
S. Boissier  
L. Cambrézy  
C. Charbonnel  
M. Deleuil  
F. Martins  
R. Monier  
D. Puy

#### LOC

J. Ballet  
J.-M. Bonnet-Bidaud  
P. Bouchet  
F. Bournaud  
Ph. Briet  
P.-A. Duc  
D. Gilles  
M. González  
P.-O. Lagage  
S. Rodriguez  
C. Toutain  
H. Triou

<b>Table of contents</b>	<b>i</b>
<b>Foreword</b>	<b>ix</b>
<b>List of participants</b>	<b>xi</b>
<b>SF2A — Session plénière (S00)</b>	<b>1</b>
Complex organic molecules and star formation <i>A. Bacmann, and A. Faure</i>	<b>3</b>
Tracing PDR properties and structure in the closest massive low metallicity star-forming region: 30 Doradus in the LMC <i>M. Chevance, S. Madden, V. Lebouteiller, L. Carlson, D. Cormier, F. Galliano, M.-Y. Lee, and R. Wu</i>	<b>9</b>
Using the Virtual Observatory: multi-instrument, multi-wavelength study of high-energy sources <i>S. Derrière, R. W. Goosmann, C. Bot, and F. Bonnarel</i>	<b>13</b>
Scientific Use Cases for the Virtual Atomic and Molecular Data Center <i>M.L. Dubernet, J. Abouadarham, Y.A. Ba, M. Boiziot, S. Bottinelli, E. Caux, C. Endres, J.M. Glorian, F. Henry, L. Lamy, et al.</i>	<b>17</b>
Pulsars all across the spectrum <i>L. Guillemot</i>	<b>25</b>
Postcard from Gaia <i>D. Katz</i>	<b>33</b>
Exocomets in the disk of two young A-type stars <i>F. Kiefer, A. Lecavelier des Etangs, and A. Vidal-Madjar</i>	<b>39</b>
Magnetohydrodynamics and Solar Physics <i>Michel Rieutord</i>	<b>45</b>
<b>Environnement planétaire et habitabilité: de la Terre primitive aux exoplanètes (S01)</b>	<b>51</b>
A radiative-convective equilibrium model for young giant exoplanets: Application to GPI commissioning data <i>J.-L. Baudino, B. Bézard, A. Boccaletti, A.-M. Lagrange, M. Bonnefoy, and R. Galicher</i>	<b>53</b>
The June 6 2012 transit of Venus: Imaging and spectroscopic analysis of the upper atmosphere emission <i>C. Bazin, X. Zhi, D. Valls-Gabaud, S. Koutchmy, P. Rocher, Z.Y. Zin, Y. Fu, L. Yang, G.Q. Liu, Z. Liu, et al.</i>	<b>57</b>
Dynamics of exoplanetary systems, links to their habitability <i>E. Bolmont, S. N. Raymond, and F. Selsis</i>	<b>63</b>
Wind circulation regimes at Venus' cloud tops : Ground-based Doppler velocimetry using CFHT/ESPaDOnS and comparison with simultaneous cloud tracking measurements using VEx/VIRTIS <i>P. Machado, T. Widemann, D. Luz, and J. Peralta</i>	<b>69</b>
Emulating JWST Exoplanet Transit Observations in a Testbed laboratory experiment <i>D. Toubi, C. A. Beichman, G. Vasisht, R. Smith, J. and E. Krist</i>	<b>75</b>

Influence of different parameters on the chemical composition of warm Neptunes <i>O. Venot, M. Agúndez, F. Selsis, M. Tessenyi, and L. Decin</i>	77
<b>Atelier général Hautes Energies (S02)</b>	<b>83</b>
Modeling the propagation of Sagittarius A's past activity <i>M. Clavel, S. Soldi, R. Terrier, A. Goldwurm, M. R. Morris, and G. Ponti</i>	85
The role of neutron star mergers and core collapse supernovae in r process nucleosynthesis <i>F. Daigne, and E. Vangioni</i>	89
Symmetry breaking between SASI spiral modes <i>R. Kazeroni, J. Guilet, and T. Foglizzo</i>	93
Simulation of the microwave emission from extensive air showers <i>Sandra Le Coz</i>	97
2004 – 2014: Ten years of radiative transfer with STOKES <i>F. Marin, and R. W. Goosmann</i>	103
Probing the Galactic center with X-ray polarimetry <i>F. Marin, V. Karas, D. Kunneriath, F. Muleri, and P. Soffitta</i>	109
The mass composition of ultra-high energy cosmic rays with the Pierre Auger Observatory <i>D. Martraire, and the Pierre Auger Collaboration</i>	113
The prompt emission of gamma-ray bursts <i>R. Mochkovitch</i>	117
Impact of Non-Axisymmetric Structure on the Flux from an Accretion Disk <i>P. Varniere, and F. Vincent</i>	123
Influence of an AGN complex photon field on the jet bulk Lorentz factor through Compton rocket effect <i>T. Vuillaume, G. Henri, and P-O. Petrucci</i>	129
<b>Atelier de préparation à l'exploitation scientifique de l'instrument GRAVITY (S05)</b>	<b>133</b>
Planet formation in multiple stellar systems: GG Tau A <i>E. Di Folco, A. Dutrey, S. Guilloteau, J.-B. Le Bouquin, S. Lacour, et al.</i>	135
Observation of asteroids with GRAVITY - Physical characterization of binary systems <i>A. Matter, M. Delbo, B. Carry, and P. Tanga</i>	139
Image reconstruction in polychromatic interferometry <i>F. Soulez</i>	145
<b>Réunion des utilisateurs des télescopes français (TBL/OHP) (S06)</b>	<b>149</b>
Telescope Bernard Lyot beyond Narval: Neo-Narval and SPIP <i>R. Cabanac, TBL Team, Neo-Narval Team, and SPIP Team</i>	151
Mutualized service for the management of the astronomical observations at the TBL and the OHP <i>E. Cottalorda</i>	155

Derivation of the mass ratios of 20 new double-lined spectroscopic binaries <i>J.-L. Halbwachs, F. Arenou, D. Pourbaix, B. Famaey, P. Guillout, Y. Lebreton, J.-B. Salomon, L. Tal-Or, R. Ibata, and T. Mazeh</i>	<b>159</b>
A search for Vega-like fields in OB stars <i>C. Neiner, C. P. Folsom, and A. Blazere</i>	<b>163</b>
<b>Herschel: le bilan en planétologie (système solaire et disques de débris) (S07)</b>	<b>167</b>
Resolving the inconsistency between the ice giants and cometary D/H ratios <i>Mohamad Ali-Dib, Olivier Mousis, Jean-Marc Petit, and Jonathan I. Lunine</i>	<b>169</b>
The origin of external oxygen in Jupiter and Saturn's environments <i>T. Cavalié, E. Lellouch, P. Hartogh, R. Moreno, F. Billebaud, D. Bockelée-Morvan, N. Biver, T. Cassidy, R. Courtin, J. Crovisier, et al.</i>	<b>173</b>
Tau Ceti: our nearest cousin <i>E. Di Folco, J. Péricaud, J.-C. Augereau, J. and Marshall</i>	<b>177</b>
Insights on complex exoplanetary systems and their dynamical history with Herschel <i>V. Faramaz, H. Beust, J.-C. Augereau, P. Kalas, J.R. Graham, and The Herschel-DUNES team</i>	<b>181</b>
LIDT-DD: A new hybrid model to understand debris discs observations - The case of massive collisions. <i>Q. Kral, P. Thébault, J.-C. Augereau, A. Boccaletti, and S. Charnoz</i>	<b>187</b>
Detailed models of a sample of debris disks: from Herschel, KIN and Spitzer to the JWST <i>J. Lebreton, C. Beichman, and J.C. Augereau</i>	<b>193</b>
<b>Interaction étoiles planètes (S08)</b>	<b>197</b>
Hydrodynamical scaling laws to study tidal dynamics in planetary systems <i>P. Auclair-Desrotour, C. Le Poncin-Lafitte, and S. Mathis</i>	<b>199</b>
Time Evolution of a Viscous Protoplanetary Disk with a Free Geometry and Realistic Opacities. <i>K. Baillié, and S. Charnoz</i>	<b>205</b>
The photosphere-corona Interface: enrichment of the corona in low FIP elements and helium shells <i>C. Bazin, S. Koutchmy, P. Lamy, and I. Veselovski</i>	<b>209</b>
Planet frequency from microlensing observations <i>A. Cassan, and C. Ranc</i>	<b>213</b>
Spin-Orbit angle distribution and the origin of (mis)aligned hot Jupiters <i>A. Crida, and K. Batygin</i>	<b>217</b>
Photophoresis in protoplanetary disks: a numerical approach <i>N. Cuello, F. C. Pignatale, and J.-F. Gonzalez</i>	<b>221</b>
What can stellar magnetic fields tell us about star-planet interactions? <i>R. Fares, C. Moutou, and J.-F. Donati</i>	<b>227</b>
Inertial waves in differentially rotating low-mass stars and tides <i>M. Guenel, C. Baruteau, S. Mathis, and M. Rieutord</i>	<b>233</b>

Understanding tidal dissipation in gaseous giant planets : the respective contributions of their core and envelope <i>M. Guenel, S. Mathis, and F. Remus</i>	<b>237</b>
Impact of magnetic field on radial velocity measurements. <i>E.M. Hébrard, X. Delfosse, J. Morin, I. Boisse, C. Moutou, and G. Hébrard</i>	<b>241</b>
Impact of stellar activity on the determination of stellar parameters with interferometry <i>R. Ligi, D. Mourard, A.-M. Lagrange, K. Perraut, and A. Chiavassa</i>	<b>245</b>
Tidal friction in rotating turbulent convectivestellar and planetary regions <i>S. Mathis, P. Auclair-Desrotour, M. Guenel, and C. Le Poncin-Lafitte</i>	<b>251</b>
Constraining stellar magnetic activity with asteroseismology <i>S. Mathur</i>	<b>257</b>
A 2D dust chemistry of the inner Solar Nebula <i>F.C. Pignatale, K. Liffman, S.T. Maddison, and G. Brooks</i>	<b>263</b>
Brown dwarfs detections through microlensing <i>C. Ranc, A. Cassan, PLANET, MOA, FUN, and RoboNet</i>	<b>269</b>
Influence of the mass distribution on the magnetic field topology in spherical, anelastic dynamo simulations <i>R. Raynaud, L. Petitdemange, and E. Dormy</i>	<b>273</b>
Modelling the Corona of HD 189733 in 3D <i>A. Strugarek, A. S. Brun, S. P. Matt, V. Reville, J. F. Donati, C. Moutou, and R. Fares</i>	<b>279</b>
Consequences of the accretion of planetary matter on the chemical composition of the stars. <i>S. Vauclair, and G. Vauclair</i>	<b>285</b>
<b>Comment fabrique-t-on une galaxie? L'évolution des baryons dans les halos de matière noire (S09)</b>	<b>291</b>
Galaxy clusters in the cosmic web <i>A. Acebrón, F. Durret, N. Martinet, C. Adami, L. Guennou, and the DAFT/FADA team</i>	<b>293</b>
Simulating mock catalogues to provide accurate cluster selection functions. <i>B. Ascaso, S. Mei, and N. Benitez</i>	<b>299</b>
The Violent Youth of Bright and Massive Cluster Galaxies and their Maturation over 7 Billion Years <i>B. Ascaso, B. Lemaux, L. M. Lubin, R.R. Gal, D.D. Kocevski, N. Rumbaugh, and G. Squires</i>	<b>303</b>
Galaxy stellar mass assembly: supernova feedback, photo-ionization and no-star-forming gas reservoir. <i>M. Cousin</i>	<b>307</b>
Galaxy clusters in the SDSS Stripe 82 <i>F. Durret, C. Adami, E. Bertin, J. Hao, I. Márquez, N. Martinet, S. Maurogordato, T. Sauvaget, N. Sceph, and M.P. Ulmer</i>	<b>315</b>
Magnetogenesis at Cosmic Dawn <i>J.-B. Durrive, and M. Langer</i>	<b>321</b>
On the stability of self-gravitating filaments <i>J. Freundlich, C. J. Jog, F. Combes, and S. Anathpindika</i>	<b>325</b>

Disc galaxies: Molecular hydrogen, star formation and radial migration <i>A. Halle, F. Combes, P. Di Matteo, and M. Haywood</i>	<b>329</b>
The first <i>HST</i> Frontier Fields cluster : search for $z > 7.5$ galaxies <i>N. Laporte, F. E. Bauer, S. Kim, R. Pelló, I. Pérez-Fournon, D. Schaerer, and A. Streblyanska</i>	<b>333</b>
High resolution spectroscopy of Red Giant Branch stars and the chemical evolution of the Fornax dwarf spheroidal galaxy <i>B. Lemasle, T.J.L. de Boer, V. Hill, E. Tolstoy, M. J. Irwin, P. Jablonka, K. Venn, G. Battaglia, et al.</i>	<b>337</b>
Galaxy cluster detection in the Next Generation Virgo Cluster Survey (NGVS) <i>R. Licitra, S. Mei, A. Raichoor, T. Erben, H. Hildebrandt, O. Ilbert, M. Huertas-Company, L. Van Waerbeke, P. Côté, J.-C. Cuillandre, et al.</i>	<b>341</b>
Galaxy luminosity function: evolution at high redshift <i>Nicolas Martinet, Florence Durret, Loïc Guennou, Christophe Adami, and the DAFT/FADA team</i>	<b>347</b>
Understanding the state of the gas surrounding Andromeda's black hole. <i>A.-L. Melchior, and F. Combes</i>	<b>351</b>
Probing Gas Flows around Galaxies with SINFONI <i>C. Peroux</i>	<b>355</b>
Photometric redshifts for the NGVS <i>A. Raichoor, S. Mei, T. Erben, H. Hildebrandt, M. Huertas-Company, O. Ilbert, R. Licitra, N.M. Ball, S. Boissier, A. Boselli, et al.</i>	<b>359</b>
Thermal and radiative AGN feedback : weak impact on star formation in high-redshift disk galaxy simulations <i>O. Roos, S. Juneau, F. Bournaud, and J. M. Gabor</i>	<b>363</b>
Galaxy Formation History Through Hod Model From Euclid Mock Catalogs <i>Z. Sakr, and C. Benoist</i>	<b>367</b>
3C 285: a nearby galaxy with jet-induced star formation <i>Q. Salomé, P. Salomé, and F. Combes</i>	<b>371</b>
Lyman- $\alpha$ blobs: polarization arising from cold accretion <i>M. Trebitsch, A. Verhamme, J. Blaizot, and J. Rosdahl</i>	<b>375</b>
<b>NOEMA (S10)</b>	<b>379</b>
PdBI high-resolution high-sensitivity imaging of a strongly lensed submillimeter source at $z=5.24$ <i>F. Boone, F. Combes, M. Krips, J. Richard, T. Rawle, E. Egami, J.-P. Kneib, D. Schaerer, et al.</i>	<b>381</b>
High-redshift star formation efficiency as uncovered by the IRAM PHIBSS programs <i>J. Freundlich, P. Salomé, F. Combes, L. Tacconi, R. Neri, S. Garcia-Burillo, R. Genzel, T. Contini, S. Lilly, and the PHIBSS Consortium</i>	<b>387</b>
“Particle traps” at planet gap edges in disks: effects of grain growth and fragmentation <i>J.-F. Gonzalez, G. Laibe, S. T. Maddison, C. Pinte, and F. Ménard</i>	<b>391</b>
Dark cloud chemistry of nitrogen hydrides with the Herschel Space Observatory <i>R. Le Gal, P. Hily-Blant, and A. Faure</i>	<b>397</b>
<b>Atelier AS Gaia (S11)</b>	<b>403</b>

Preparing the modelling of Gaia products for Galactic structure and dynamics with mock datasets <i>Laurent Chemin</i>	<b>405</b>
Metal-poor benchmark stars and Gaia <i>O. Creevey, J. Thévenin, U. Heiter, D. Mourard, P. Berio, T. Boyajian, P. Kervella, N. Nardetto, and L. Bigot</i>	<b>411</b>
Additional auxiliary data for the GAIA-RVS <i>F. Crifo, L. Chemin, G. Jasiewicz, D. Katz, O. Marchal, P. Sartoretti, C. Soubiran, F. Thévenin, and T. Zwitter</i>	<b>417</b>
Gaia and the Extragalactic <i>C. Ducourant, A. Krone-Martins, L. Galluccio, and R. Teixeira</i>	<b>421</b>
The programme "accurate masses for SB2 components" <i>J.-L. Halbwachs, F. Arenou, B. Famaey, P. Guillout, R. Ibata, Y. Lebreton, T. Mazeh, A. Nebot, D. Pourbaix, J.-B. Salomon, et al.</i>	<b>427</b>
RAVE: Results and Updates from Data Release 4 <i>G. Kordopatis, and RAVE collaboration</i>	<b>431</b>
Reconstructing the SFH of the Milky Way <i>O. N. Snaith, M. Haywood, P. Di Matteo, and M. Lehnert</i>	<b>437</b>
On the chemical composition of Open Clusters <i>C. Soubiran, S. Blanco-Cuaresma, and U. Heiter</i>	<b>441</b>
Gaia-FUN-SSO: a network for ground-based follow-up observations of Solar System Objects <i>W. Thuillot, B. Carry, J. Berthier, P. David, D. Hestroffer, and P. Rocher</i>	<b>445</b>
<b>Atelier PNPS (S12)</b>	<b>449</b>
Automated procedure to derive fundamental parameters of B and A stars: Application to the young cluster NGC 3293 <i>E. Aydi, M. Gebran, R. Monier, F. Royer, A. Lobel, and R. Blomme</i>	<b>451</b>
Identification of protostellar clusters in the inner part of the milky way : Interaction between the ISM and star forming regions. <i>M. Beuret, N. Billot, L. Cambrésy, D. Elia, S. Molinari, S. Pezzuto, M. Pestalozzi, and E. Schisano</i>	<b>457</b>
Ultra-weak magnetic fields in Am stars: $\beta$ UMa and $\theta$ Leo <i>A. Blazère, P. Petit, F. Lignières, M. Aurière, T. Böhm, and G. Wade</i>	<b>463</b>
Surface rotation of solar-like oscillating stars <i>T. Ceillier, R.A. García, D. Salabert, and S. Mathur</i>	<b>467</b>
Measurements of eight early-type stars angular diameters using VEGA/CHARA interferometer <i>M. Challouf, N. Nardetto, D. Mourard, H. Aroui, and O. Delaa</i>	<b>471</b>
Non-LTE modeling of cold stellar atmospheres <i>N. Feautrier, A. Spielfiedel, M. Guitou, and A. K. Belyaev</i>	<b>475</b>
Evolution of the chemical element abundances with age in open clusters: The Hyades, Pleiades, Coma Berenices and M6 <i>T. Kılıçoğlu, R. Monier, M. Gebran, and L. Fossati</i>	<b>479</b>

Constraining the transport processes in stellar interiors with red giant stars <i>Lagarde N., Eggenberger P., Miglio, A., and Montalbà, J.</i>	<b>483</b>
Stellar opacity validations <i>M. Le Pennec, S. Turck-Chièze, X. Ribeyre, and J.E. Ducret</i>	<b>487</b>
Gravito-inertial modes in a differentially rotating spherical shell <i>G. M. Mirouh, C. Baruteau, M. Rieutord, and J. Ballot</i>	<b>493</b>
HD 30085: a new Pt-Hg rich late B-type star <i>R.Monier, M.Gebran, F.Royer, and E.Griffin</i>	<b>497</b>
Review and latest news from the VEGA/CHARA facility <i>N. Nardetto, D. Mourard, K. Perraut, I. Tallon-Bosc, A. Meilland, P. Stee, R. Ligi, M. Challouf, J.-M. Clausse, P. Berio, et al.</i>	<b>501</b>
The BRITE spectropolarimetric survey <i>C. Neiner, and A. Lèbre</i>	<b>505</b>
The influence of the magnetic topology on the wind braking of sun-like stars. <i>V. Réville, A. S. Brun, S. P. Matt, A. Strugarek, and R. Pinto</i>	<b>509</b>
The Stark-B database VAMDC node for spectral line broadening by collisions with charged particles <i>S. Sahal-Bréchet, M.S. Dimitrijević, N. Moreau, and N. Ben Nessib</i>	<b>515</b>
Helioseismic inferences of the solar cycles 23 and 24: GOLF and VIRGO observations <i>D. Salabert, R.A. García, and A. Jiménez</i>	<b>523</b>
Laboratory determination of spectroscopic data for stellar physics <i>W.-Ü L. Tchang-Brillet, J.-F. Wyart, Ali Meftah, N. Champion, and Ch. Blaess</i>	<b>527</b>
Helium signature in red giant oscillation spectra <i>Vrard M., Mosser B., and Barban C.</i>	<b>531</b>
<b>Author Index</b>	<b>535</b>
