

Proceedings of the annual meeting  
of the French Society of Astronomy & Astrophysics  
Lyon, June 14-17, 2016

# SEMAINE DE L'ASTROPHYSIQUE

14-17 JUIN 2016 LYON

Université de Lyon  
90 rue Pasteur 69007 Lyon  
<http://2016.sf2a.eu>

## JOURNÉES DE LA SF2A

Sessions plénières  
Ateliers scientifiques  
Société invitée :  
Astronomische Gesellschaft

### SCIENTIFIC ORGANIZING COMMITTEE

H. Wozniak (Président SF2A),  
S. Boissier (Vice-Président SF2A),  
C. Reylé (Vice-Présidente UAI/SF2A),  
J. Ballet, J. Braine, V. Buat,  
L. Cambrésy, M. Deleuil, F. Martins,  
R. Monier, A. Palacios, P. Petit

### LOCAL ORGANIZING COMMITTEE

J. Richard (Chair),  
L. Tresse (Directrice CRAL),  
M. François, M-H. Lassalle,  
E. Pécontal, I. Vauglin,  
S. Vigner, C. Vilatte

## ÉVÈNEMENTS

Prix Jeune Chercheur et  
Jeune Enseignant-Chercheur  
Prix scolaire « Découvrir l'Univers »  
Prix de thèse  
Conférence Grand Public

Credit: Caroline Vilatte

<b>Table of contents</b>	<b>i</b>
<b>Foreword</b>	<b>vii</b>
<b>List of participants</b>	<b>ix</b>
<b>SF2A — Plenary session (S00)</b>	<b>1</b>
Identifying the non-linearities in the period-luminosity relations of Cepheids <i>J. Dassa-Terrier</i>	<b>3</b>
Modeling Small Exoplanets Interiors: a Numerical Scheme to Explore Possible Compositions <i>B. Brugger, O. Mousis, and M. Deleuil</i>	<b>11</b>
Sciences pour les Exoplanètes et les Systèmes Planétaires <i>F. Roques, C. Balança, Y. Bénilan, J.M. Griessmeier, E. Marcq, T. Navarro, S. Renner, J. Schneider,     and C. Schott</i>	<b>17</b>
SITELE's Data Release 1 <i>T. B. Martin, and L. Drissen</i>	<b>23</b>
<b>Gravitational waves (S01)</b>	<b>29</b>
Searching for gamma-ray counterpart of gravitational wave transients <i>H. Sol</i>	<b>31</b>
<b>High energy and cosmic phenomena (S02)</b>	<b>37</b>
Multiwavelength study of the flaring activity of Sgr A* in 2014 February–April <i>E. Mossoux, N. Grosso, H. Bushouse, A. Eckart, F. Yusef-Zadeh, R. L. Plambeck, F. Peissker, M. Valencía,     D. Porquet, W. D. Cotton, et al.</i>	<b>39</b>
Why curvature radiation in neutron-star magnetospheres should be treated in the framework of quantum electrodynamics <i>G. Voisin, S. Bonazzola, and F. Mottez</i>	<b>45</b>
Models of magnetized white dwarfs <i>M. Oertel, D. Chatterjee, A.F. Fantina, N. Chamel, and J. Novak</i>	<b>51</b>
Understanding Active Galactic Nuclei using near-infrared high angular resolution polarimetry I : MontAGN - STOKES comparison <i>L. Grosset, F. Marin, D. Gratadour, R. Goosmann, D. Rouan, Y. Clénet, D. Pelat, and P. A. Rojas     Lobos</i>	<b>57</b>
From FERMI-LAT observations to the blind pulsar survey SPAN512 with the Nançay Radio Telescope <i>F. Octau, G. Desvignes, I. Cognard, D. Champion, P. Lazarus, D. Smith, and G. Theureau</i>	<b>61</b>
Consequences of rotating off-centred dipolar electromagnetic field in vacuum around Pulsars <i>A. Kundu, and J. Pétri</i>	<b>65</b>
Steady-state model of accretion columns in magnetic cataclysmic variables <i>L. Van Box Som, É. Falize, J.-M. Bonnet-Bidaud, M. Mouchet, C. Busschaert, and A. Ciardi</i>	<b>69</b>

Energy dependent variability and outburst evolution in black hole X-ray binaries <i>H. Stiele, and A. K. H. Kong</i>	<b>73</b>
GCT, the Gamma-ray Cherenkov Telescope for multi-TeV science with the Cherenkov Telescope Array <i>H. Sol, J.-L. Dournaux, P. Laporte, and the GCT Team and CTA Consortium</i>	<b>77</b>
Models of fast radio bursts at cosmological distances <i>F. Mottez, C. Guépin, K. Kotera, G. Voisin, and P. Zarka</i>	<b>83</b>
Modeling the reverberation of optical polarization in AGN <i>P. A. Rojas Lobos, R. Goosmann, and F. Marin</i>	<b>89</b>
Multiwavelength Study of <i>Fermi-LAT</i> blazars <i>Variability and Radiation Production Mechanisms</i> <i>R. J. Britto, E. Bottacini, M. Böttcher, D. A. H. Buckley, S. Buson, B. Lott, J. P. Marais, P. J. Meintjes, et al.</i>	<b>93</b>
Understanding Active Galactic Nuclei using near-infrared high angular resolution polarimetry II: Preliminary results <i>F. Marin, L. Grosset, R. Goosmann, D. Gratadour, D. Rouan, Y. Clénet, D. Pelat, and P. A. Rojas Lobos</i>	<b>103</b>
Hall-MHD simulations of the Kelvin-Helmholtz instability at the solar wind/magnetosphere interface <i>M. H. J. Leroy, and R. Keppens</i>	<b>107</b>
From Auger to AugerPrime: Understanding Ultrahigh-Energy Cosmic Rays <i>F. Montanet, for the Pierre Auger Collaboration</i>	<b>111</b>
Which mechanism for gamma-ray flares of the Crab nebula ? <i>T. Akramov, and H. Baty</i>	<b>115</b>
<b>Numerical simulations in astrophysics (S03)</b>	<b>119</b>
Numerical relativity and spectral methods <i>P. Grandclement</i>	<b>121</b>
Hall magneto-hydrodynamics in protoplanetary discs <i>W. Béthune, G. Lesur, and J. Ferreira</i>	<b>129</b>
Perspectives in numerical astrophysics: Towards an exciting future in the exascale era <i>V. Reverdy</i>	<b>133</b>
The gaseous proto-cluster: better characterizing the initial conditions of stellar cluster formation? <i>Y.-N. Lee, and P. Hennebelle</i>	<b>139</b>
How baryonic feedback processes can affect dark matter halos: a stochastic model <i>J. Freundlich, A. El-Zant, and F. Combes</i>	<b>153</b>
Kinetic simulations of collisionless magnetic reconnection <i>N. Aunai, J. Dargent, B. Lavraud, A. Ciardi, M. Drouin, and R. Smets</i>	<b>157</b>
Chemistry and dynamics: a post-processing tool towards a real coupling <i>V. Valdivia, B. Godard, P. Hennebelle, M. Gerin, and P. Lesaffre</i>	<b>163</b>
Simulating the local Universe <i>J. G. Sorce</i>	<b>169</b>

<b>Stellar physics (S04)</b>	<b>177</b>
Influence of plume-induced internal gravity waves on the rotation profile of low-mass stars <i>C. Pinçon, K. Belkacem, and M. J. Goupil</i>	<b>179</b>
Magnetic activity of seismic solar analogs <i>D. Salabert, R. A. García, P. G. Beck, and the SSA team</i>	<b>185</b>
The gaseous proto-cluster as a product of gravo-turbulent interaction: modified local environment for stellar cluster formation? <i>Y.-N. Lee, and P. Hennebelle</i>	<b>189</b>
The changing magnetic fields of intermediate-mass T Tauri stars <i>F. Villebrun, E. Alecian, J. Bouvier, G. Hussain, and C. P. Folsom</i>	<b>199</b>
Formation history of old open clusters constrained by detailed asteroseismology of red giant stars observed by <i>Kepler</i> <i>E. Corsaro, Y.-N. Lee, R. A. García, P. Hennebelle, S. Mathur, P. G. Beck, S. Mathis, D. Stello, and J. Bouvier</i>	<b>203</b>
PAIX the First Robotic Antarctica Polar Mission <i>M. Chadid</i>	<b>207</b>
HR8844: a new hot Am star? <i>R. Monier, M. Gebran, and F. Royer</i>	<b>209</b>
HD 30963: a new HgMn star <i>R. Monier, M. Gebran, and F. Royer</i>	<b>213</b>
Internal rotation of $\gamma$ Doradus stars <i>R.-M. Ouazzani, S. J. A. J. Salmon, V. Antoci, T. R. Bedding, and S. J. Murphy</i>	<b>217</b>
The PHOENIX Model Atmosphere Grid for Stars <i>F. Allard</i>	<b>223</b>
The photometric variability of $\zeta$ Ori Aa observed by BRIT <sup>E</sup> * ** <i>B. Buysschaert, C. Neiner, and BEST</i>	<b>229</b>
<b>Users meeting of the French telescopes - TBL/OHP193 (S05)</b>	<b>235</b>
Telescope Bernard Lyot: operation, instrumentation, perspectives <i>R. Cabanac, and TBL Team</i>	<b>237</b>
Follow-up and characterization of the <i>TESS</i> exoplanets with SOPHIE, SPIRou, and <i>JWST</i> <i>N. Crouzet, X. Bonfils, X. Delfosse, I. Boisse, G. Hébrard, T. Forveille, J.-F. Donati, F. Bouchy, C. Moutou, R. Doyon, et al.</i>	<b>243</b>
Ground-based follow-up of the Gaia-RVS radial velocity standards <i>C. Soubiran, G. Jasniewicz, C. Zurbach, F. Crifo, P. Sartoretti, D. Katz, O. Marchal, P. Panuzzo, and S. Udry</i>	<b>249</b>
A new family of magnetic stars: the Am stars <i>A. Blazère, C. Neiner, P. Petit, and F. Lignières</i>	<b>253</b>
<b>WEAVE (S06)</b>	<b>257</b>

WEAVE-QSO: A Massive Intergalactic Medium Survey for the William Herschel Telescope <i>M. M. Pieri, S. Bonoli, J. Chaves-Montero, I. Pâris, M. Fumagalli, J. S. Bolton, M. Viel, P. Noterdaeme, J. Miralda-Escudé, N. G. Busca, et al.</i>	<b>259</b>
WEAVE an overview and status update <i>P. Bonifacio, G. Dalton, S. Trager, A. L. Aguerri, E. Carrasco, A. Vallenari, D. C. Abrams, K. Middleton, F. Sayède, and the WEAVE Instrument Consortium</i>	<b>267</b>
The WEAVE-LOFAR Survey <i>D. J. B. Smith, P. N. Best, K. J. Duncan, N. A. Hatch, M. J. Jarvis, H. J. A. Röttgering, C. J. Simpson, J. P. Stott, R. K. Cochrane, K. E. Coppin, et al.</i>	<b>271</b>
The WEAVE disk dynamics survey <i>B. Famaey, T. Antoja, M. Romero-Gomez, A. Siebert, C. Babusiaux, P. Di Matteo, F. Figueras, F. Fragkoudi, F. Garzon-Lopez, C. Gonzalez-Fernandez, et al.</i>	<b>281</b>
Red-giant stars: Chemical clocks in the Milky Way <i>N. Lagarde, A.C. Robin, C. Reylé, and G. Nasello</i>	<b>287</b>
<b>National and international synergies in space meteorology (S07)</b>	<b>291</b>
METEOSPACE, solar monitoring and space weather at Calern observatory <i>T. Corbard, J.-M. Malherbe, D. Crussaire, F. Morand, F. Ruty, L. Biree, J. Abouadarham, N. Fuller, C. Renaud, and M. Meftah</i>	<b>293</b>
Space-weather assets developed by the French space-physics community <i>A. P. Rouillard, R. F. Pinto, A. S. Brun, C. Briand, S. Bourdarie, T. Dudok De Wit, T. Amari, P.-L. Blelly, E. Buchlin, A. Chambodut, et al.</i>	<b>297</b>
<b>Cosmic rays and interstellar medium (S08)</b>	<b>307</b>
Consequences of warm H <sub>2</sub> on the chemistry of diffuse molecular clouds: the case of CH <i>V. Valdivia, B. Godard, P. Hennebelle, M. Gerin, and P. Lesaffre</i>	<b>309</b>
H.E.S.S. and CTA, present and perspectives in ground-based gamma-ray astronomy <i>H. Sol</i>	<b>315</b>
<b>Exogenous inputs and origin of life (S09)</b>	<b>319</b>
Complex organic molecules toward low-mass and high-mass star forming regions <i>C. Favre, C. Ceccarelli, B. Lefloch, E. Bergin, M. Carvajal, N. Brouillet, D. Despois, J. Jørgensen, and I. Kleiner</i>	<b>321</b>
<b>Services and databases in spectroscopy (S11)</b>	<b>327</b>
Desirable evolutions of stellar spectroscopic services in the light of current studies of remote stellar populations. <i>A. Lançon, P. Prugniel, M. Powalka, and I. Vauglin</i>	<b>329</b>
Re-grouping stars based on the chemical tagging technique: A case study of M67 and IC4651 <i>S. Blanco-Cuaresma, and C. Soubiran</i>	<b>333</b>
<b>SKA-LOFAR (S12)</b>	<b>337</b>

The NOIRE Study <i>B. Cecconi, A. Laurens, C. Briand, J. Girard, M. Bucher, D. Puy, B. Segret, M. Bentum, and the NOIRE team</i>	<b>339</b>
Mapping the radio sky from 0.1 to 100 MHz with NOIRE <i>B. Cecconi, A. Laurens, C. Briand, J. Girard, M. Bucher, D. Puy, B. Segret, M. Bentum, and the NOIRE team</i>	<b>343</b>
Observations of Fast Radio Bursts and perspectives at low frequencies <i>P. Zarka, and F. Mottez</i>	<b>347</b>
Faraday tomography with LOFAR: new probe of the interstellar magnetic field <i>M. I. R. Alves, V. Jelić, K. Ferrière, and F. Boulanger</i>	<b>353</b>
Algorithmic aspects for the reconstruction of spatio-spectral data cubes in the perspective of the SKA <i>D. Mary, A. Ferrari, C. Ferrari, J. Deguignet, and M. Vannier</i>	<b>357</b>
Non-thermal emission and dynamical state of massive galaxy clusters from <i>CLASH</i> sample <i>M. Pandey-Pommier, J. Richard, F. Combes, A. Edge, B. Guiderdoni, D. Narasimha, J. Bagchi, and J. Jacob</i>	<b>367</b>
The low-frequency radio emission in blazar PKS2155-304 <i>M. Pandey-Pommier, S. Sirothia, P. Chadwick, J.-M. Martin, P. Colom, W. van Driel, F. Combes, P. Kharb, P.-J. Crespeau, J. Richard, et al.</i>	<b>373</b>
AGN duty cycle and relic emission in the low frequency sky <i>M. Pandey-Pommier, H. Intema, G. Heald, and on behalf of the MSSS team and the LOFAR collaboration</i>	<b>379</b>
Radio mode feedback via BCGs in cool core clusters <i>S.-L. Hamer, M. P. Pommier, A.-C. Edge, and F. Combes</i>	<b>385</b>
<b>The Epoch of Reionisation (S13)</b>	<b>391</b>
The intrinsic evolution of Ly $\alpha$ -emitting galaxies from $z \approx 3$ to the epoch of reionization <i>T. Garel</i>	<b>393</b>
Stellar feedback during the reionization with EMMA <i>N. Deparis, D. Aubert, and P. Ocvirk</i>	<b>399</b>
21cm bispectrum as method to measure cosmic dawn and EoR <i>H. Shimabukuro</i>	<b>403</b>
Feedback regulated escape of ionising radiation from high redshift galaxies <i>M. Trebitsch, and J. Blaizot</i>	<b>407</b>
Photometric and Spectroscopic analysis of lensed re-ionising sources at the frontier of the Universe <i>N. Laporte, R. Ellis, G. Roberts-Borsani, L. Infante, W. Zheng, F.E. Bauer, D. Bina, I. Chilingarian, S. Kim, R. Pelló, et al.</i>	<b>411</b>
High- $z$ galaxies & Reionization <i>R. Pelló</i>	<b>417</b>
Large scale opacity fluctuations in the Lyman alpha forest: Do QSOs dominate the UVB at $z \sim 5.5-6$ ? <i>J. Chardin, E. Puchwein, and M. G. Haehnelt</i>	<b>423</b>

<b>The (sub) millimetric universe at high angular resolution: the ALMA and NOEMA revolution continues (S14)</b>	<b>427</b>
A new insight of the northern filaments of Centaurus A <i>Q. Salomé, P. Salomé, F. Combes, and S. Hamer</i>	<b>429</b>
The axisymmetric envelopes of RS Cnc and EP Aqr <i>T. Le Bertre, D. T. Hoai, P. T. Nhung, and J. M. Winters</i>	<b>433</b>
NIKA2, a dual-band millimetre camera on the IRAM 30 m telescope to map the cold universe <i>F.-X. Désert, R. Adam, P. Ade, P. André, H. Aussel, A. Beelen, A. Benoît, A. Bideaud, N. Billot, O. Bourrion, et al.</i>	<b>439</b>
<b>Observation of the discs with the new generation instruments - ALMA, SPHERE...- (S15)</b>	<b>443</b>
Evolution of solids in the Jovian subnebula: Implications for the formation of the Galilean satellites <i>T. Ronnet, O. Mousis, and P. Vernazza</i>	<b>445</b>
Growing porous grains: a solution to the radial-drift barrier <i>A. J. L. Garcia, J.-F. Gonzalez, and F. C. Pignatale</i>	<b>449</b>
Could the stellar magnetic field explain the vertical structures in the AU Mic debris disk? <i>É. Sezestre, and J.-C. Augereau</i>	<b>455</b>
Review of gas and dust in debris discs <i>Q. Kral</i>	<b>463</b>
Migration of accreting giant planets <i>A. Crida, B. Bitsch, and A. Raibaldi</i>	<b>473</b>
Spirals, gaps, cavities, gapities: What do planets do in discs? <i>A. Crida</i>	<b>477</b>
<b>Author Index</b>	<b>481</b>
