Foreword i

List of participants v

SF2A — Plenary session (S00) 1

SF2A Environmental Transition Commission: Chosen pieces from the survey 'French A&A research activities in the face of the environmental crisis, from 2019 to 2024'
F. Cantalloube, C. Noûs, A. Jolly, J. Milli, J.-F. Gonzalez, and F. Laurent 3

Data from NenuFAR, an SKA pathfinder: a challenge in a constrained landscape.
B. Cecconi 11

On the current national landscape for the scientific and technological contributions to ANDES Spectrograph at the ELT
A. Chiavassa, I. Boisse, X. Bonfils, J. Morin, P. Noterdaeme, P. Petit, M. Turbet, C. Baillet, P. Berio, L. Bonhomme, et al. 17

Paris Astronomical Data Centre: 20 years and counting
S. Erard, P. Le Sidaner, C. Boisson, and Z. Meliani 23

Commission Femmes et Astronomie de la SF2A : Women participation in French Astronomy 2025
N. Lagarde, R.-M. Ouazzani, J. Malzac, M. Clavel, P. de Laverny, L. Leboulleux, I. Vauglin, C. Bot, S. Brau-Nogué, L. Ciesla, et al. 27

New Insights on the First Stars and Galaxies from the *James Webb* Space Telescope
N. Laporte 35

The early and late evolution of our Galaxy through the lens of globular clusters
G. Pagnini, and P. Di Matteo 43

The star-disk interaction regions of young stellar objects as probed with GRAVITY at the VLTI
K. Perraut, H. Nowacki, G. Bourdarot, J. Bouvier, L. Labadie, C. Dougados, and the GRAVITY Collaboration 47

Atelier général de l'action thématique Exosyst 'emes (S01) 53

Unraveling the non-equilibrium chemistry of the temperate sub-Neptune K2-18 b
A. Y. Jaziri, O. Sohier, O. Venot, and N. Carrasco 55

Characterization in an era of nulling interferometry: Towards ground-breaking space missions
R. Laugier, D. Defrère, J. Kammerer, P. Huber, F. A. Dannert, J. Hansen, and M.-A. Martinod 61

A unique solution to overcome the barriers to planetesimal formation at low dust-to-gas ratio
H. Méheut, F. A. Gerosa, and J. Bec 65

© Société Française d'Astronomie et d'Astrophysique (SF2A) 2025

GRAVITY+: a new eye on young giant exoplanets
N. Pourré, The ExoGRAVITY collaboration, and The GRAVITY+ collaboration **69**

Modeling Circumplanetary Disks like Protoplanetary Disks: a mistake?
K. Baillié **73**

High Time-Resolution Analysis of X-ray Data from Proxima Centauri
A. Damonte, I. Pillitteri, A. Maggio, A. García Muñoz, and G. Micela **77**

Dust populations from 30 to 1 000 au in the debris disk of HD 120326
C. Desgrange, J. Milli, G. Chauvin, M. Bonnefoy, T. Henning, J. Miley, G. Kennedy, S. Juillard, J. Olofsson, J.-C. Augereau, et al. **79**

Inferring planetary system architectures from orbital data and disk morphology
A. Lacquement, H. Beust, and G. Duchêne **81**

Atelier général de l'Action Thématique PCMI (S02) **83**

Study of the vertical and radial structure of the edge-on protoplanetary disk SSTTau042021
C. Foucher, A. Dutrey, S. Guilloteau, and V. Piétu **85**

Estimation of the physical conditions in PDRs from IGRINS ro-vibrational H_2 observations
A. Piluso, V. Maillard, E. Bron, F. Le Petit, K. F. Kaplan, P. Palud, R. Meshaka, E. Habart, J. Le Bourlot, and E. Roueff **89**

Discovery and study of the physical properties of high-mass prestellar and protostellar cores
M. Valeille-Manet, F. Louvet, F. Motte, S. Bontemps, and T. Csengeri **93**

3D extinction maps of the Milky Way solar neighbourhood with Gaia GSP-Spec
M. Barbillon, A. Recio-Blanco, P. A. Palicio, and P. de Laverny **97**

Study of the P reactions in the interstellar medium
C.-L. Chadourne, J.-C. Loison, and A. Coutens **99**

APE: providing physical conditions for chemical models and synthetic observations
A. Espagnet, P. Marchand, A. Coutens, F. Cruz-Sáenz de Miera, J.-C. Loison, and V. Wakelam **101**

Unveiling ice chemistry with SynthIceSpec - Solid CO_2 as a dust thermometer and CH_3CN detectability in cold cores
A. Taillard, P. Gratier, J. A. Noble, E. Dartois, A. C. A. Boogert, J. Keane, A. Clément, A. Maiolo, A. Fuente, and V. Wakelam **103**

NIKA2 Observations and 3D Modeling of L1506C, a prestellar core in the making
E. Zhu, I. Ristorcelli, K. Demyk, M. Juvela, N. Ysard, D. Paradis, H. Roussel, and W. Kiviaho **105**

Atelier général de l'Action Thématique Physique Stellaire (S03) **107**

The impact of the magnetic field on the stochastic excitation of acoustic modes by turbulent convection
L. Bessila, and S. Mathis **109**

The reflex instabilityorOn the importance of the inertial forces (indirect term)
A. Crida, C. Baruteau, P. Griveaud, E. Lega, F. Masset, W. Béthune, J. F. Gonzalez, H. Méheut, A. Morbidelli, F. Gerosa, et al. **115**

Magnetic fields of embedded protostars: A SPIRou investigation
L. Drouglazet, E. Alecian, C. Dougados, G. Duchêne, P. Cristofari, A. Sousa, H. Nowacki, K. Perraut, and J. Bouvier **119**

The changing shape of water-ice bands across protoplanetary disks - PDS 453, a prototype for grazing-angle disks
L. Martinien, G. Duchêne, F. Ménard, R. Tazaki, and K. R. Stapelfeldt **123**

Characterisation and determination of the orbit of an AGB star's companion: combining ALMA, VLT, Gaia observations and photometric archives
M. Montargès, P. Kervella, A. de Koter, F. Baron, F. Herpin, and L. Marinho **127**

Next-generation CFHT surveys: the Amakihi project, wide science from wide spectra
C. Moutou, A. López Ariste, and J.-F. Donati **131**

The origin of mass loss in red supergiants
Q. Pilate, A. López Ariste, P. Mathias, and A. Lavail **135**

A glance at young stellar rotators through the eyes of K2 and *Gaia*
S. N. Breton, E. Distefano, A. C. Lanzafame, and D. B. Palakkatharappil **139**

The infrared calcium triplet as a chromospheric activity indicator: from Narval and ESPaDOnS to Gaia DR4
V. Bruniquel, N. Meunier, and L. Mignon **143**

Magnetic cycles of cool stars
M. Diez, J. Morin, and P. Petit **145**

Investigating the asymmetry in the dust emission in the inner parts of protoplanetary disks : a dust-trapping vortex ?
S. Evelain, C. Baruteau, and H. Méheut **147**

Molecular formation the innermost region of O-rich and C-rich AGB stars
L. Marinho, J. P. Fonfría, M. Agúndez, L. Velilla-Prieto, G. Quintana-Lacaci Martínez, and J. Cernicharo **149**

Non-linear evolution of the horizontal shear instability: influence of the stratification and full Coriolis acceleration
C. Moisset, P. Billant, J. Park, S. Mathis and **153**

Studying massive star populations with SYMPHONY
K. Thomson-Paressant, D. M. Bowman, The SYMPHONY Team, and The Mercator Telescope Team **155**

Seismic study of the δ Scuti star 38 Eri
L. Truffert-Tkalac, D. R. Reese, and L. Manchon **159**

Implementation of OPLIB monochromatic opacities in the Cesam2k20 evolution code and impacts on solar models
M. Vidal, M. Deal, and O. Richard **161**

Realistic atmosphere in stellar evolution models for massive stars
T. Voje, A. Palacios, and F. Martins **163**

Atelier général du Programme National de Planétologie (PNP)(S04) **165**

© Société Française d'Astronomie et d'Astrophysique (SF2A) 2025

A backward Monte Carlo radiative transfer model for the Titan PCM
A. Arfaux, S. Vinatier, P. Rannou, V. Eymet, V. Forest, Z. He, B. Trenquelléon, S. Lebonnois, and E. Millour **167**

Investigating the Radiative Balance of Pluto's Atmosphere
B. de Batz de Trenquelléon, T. Bertrand, A. Falco, E. Lellouch, E. Millour, and F. Forget **171**

First GAIAMOONS occultation results with features suggestive of binarity
R. Lallemand, J. Desmars, B. Sicardy, Z. Liu, L. Liberato, and P. Tanga **177**

The VenSpec-U UV imaging spectrometer aboard the Envision mission: modes of operation and expected science
J. Lasue, E. Marcq, S. Vinatier, L. Lara, S. Bertran, B. Lustrement, E. Simonnet, A. Juin, J. Carron, L. Conan, et al. **181**

Breaking down the idea that pure ice rings implies young rings: the case of Saturn's rings.
G. Ricerchi, and A. Crida **185**

Simultaneous observations of Martian clouds by the three instruments of the Emirates Mars Mission over one Martian Year
A. Stcherbinine, J. Deighan, Z. Hallemeyer, C. S. Edwards, M. J. Wolff, S. A. Atwood, M. D. Smith, M. M. Osterloo, and N. R. Alsaeed **189**

Astronomy from the Moon
J. Schneider **193**

Exploring the frontiers of astrophysics with machine learning: New methods and current challenges (S05) **195**

Deep learning for exoplanet detection and characterizationby direct imaging at high contrast
T. Bodrito, O. Flasseur, J. Mairal, J. Ponce, M. Langlois, and A.-M. Lagrange **197**

Does deep prevail for unsupervised clustering of hyperspectral images ?
H. J. Chambon, and D. Fraix-Burnety **203**

Accelerating Bayesian inference with interpretable representations & normalizing flows
S. Dupourqué, and D. Barret **207**

Probing Cosmic Web Structures with Generative Models
M. Noor, T. Bonnaire, A. Decelle, and N. Aghanim **211**

Machine Learning-Based Identification and Classification of Bad Pixels for the Ariel Infrared AIRS Detector
A. Syty, O. Faucoz, C. Cossou, T. Pichon, P. Drossart, and J. P. Beaulieu **215**

YOLO-CL : Deep Machine Learning for Galaxy Cluster Detection with LSST
T. V. Phat, S. Mei, M. Aguena, and S. Ilić **221**

Gemini : Pro-Am collaborations (S06) **227**

The D.I.A.N.A. Project
B. Chauffeté, N. Bioud, and A. Manet **229**

Proam Commission of the Spanish Astronomical Society
I. Garate-Lopez, I. Ordonez-Etxeberria, A. Guijarro-Roman, J. Alvaro, E. Diez-Alonso, S. Ribas, A.-R. Lopez-Sanchez, and P. Cruz **233**

RAPAS 2025 : a ProAm Network dedicated to Scientific Alerts
T. Midavaine, W. Thuillot, M. Dennefeld, C. Buil, S. Neveu, M. Serrau, F. Schussler, P. Amiot, P. Andre, E. Barbotin, et al. **237**

Further Interfaces of Virtual Observatory Tools for Amateur Astronomers
R. Savalle, J.-P. Godard, C. Cavadore, and D. Valls-Gabaud **241**

Production of a Strock 250 telescope by IPSA Vega
C. da Graca Baptista, F. Nollet, A. Saint-Paul, S. Candun, M. Cellier, M. Godart, B. Veillaud, M. Levy, D. Prevost, A. Lekic, et al. **245**

From Photography to Photometry
S. Foschino **247**

First result of the BASE program: HIP 80646 is an eclipsing binary
J.-L. Halbwachs, A. Debackère, F.-J. Hambsch, and BASE collaboration **249**

The 2025 version of the Gemini database of Pro-Am collaborations
T. Midavaine **251**

BSN, latest results from the amateur-professional collaboration on the study of binary star systems
P. Pointier, C. da Graca Baptista, M. Cellier, and A. Lekic **253**

First Observations in the Pro-Am Project of Targets Within 10 pc
M. Seixas, A. Lekic, O. Cadio, A. Hassine, F. Hubert, J.-B. Desrosiers, A. Laouisset, P. Wullaert, P. Pointier, Y. Delisle, et al. **255**

Atelier calcul haute performance et simulations numériques (S07) **257**

Dawn: Simulations of the formation and early evolution of embedded clusters
Y. Bernard, E. Moraux, D. J. Price, F. Motte, F. Louvet, and I. Joncour **259**

Bridging the gap between fluid and kinetic magnetic reconnection simulations using an effective resistivity closure
M. Bugli, E. F. Lopresti, E. Figueiredo, B. Cerutti, V. Berta, G. Mattia, A. Mignone, L. Del Zanna, and G. Bodo **263**

Unveiling stellar (and planetary) internal dynamics with the fully compressible MUSIC code
A. Le Saux, I. Baraffe, T. Guillet, J. Pratt, T. Goffrey, D. Vlaykov, A. Morison, J. Morton, M. Stuck, M. G. Dethero, et al. **265**

High-performance integral transforms for the next generation of astrophysical codes
T. Maamaatuaiahutapu, and V. Reverdy **271**

Relations Soleil-Terre et météorologie de l'espace (S08) **275**

Locating the Earth's Magnetopause through X-ray imaging
P. Boskou, D. Koutroumpa, R. Modolo, and Q. Xu **277**

Etudier l'évolution des galaxies et la cosmologie dans la perspective des futurs grands observatoires (S09) **281**

Probing binary supermassive black hole in quasars through spectropolarimetry
J. Biedermann, and F. Marin **283**

© Société Française d'Astronomie et d'Astrophysique (SF2A) 2025

Tracing HI distribution and ionizing photon escape in star-forming galaxies across cosmic time with current and upcoming IFS
F. Leclercq, and the LzLCS collaboration **287**

Litmus tests of the flat ΛCDM model and model-independent measurement of $H_0 r_d$ with LSST and DESI
B. L'Huillier **291**

The Milky Way signature of spiral arms through the ages
M. Barbillon, A. Recio-Blanco, E. Poggio, P. A. Palicio, E. Spitoni, T. Tepper-García, P. de Laverny, G. Cescutti, and J. Bland-Hawthorn **295**

Studying the gas content of low surface brightness galaxies
S. Boissier, A. Boselli, Junais, E. Bernaud, and P. Serra **297**

Towards a study of gas accretion onto supermassive black holes: gas flows in barred galaxies
F. Dedieu, A. Hallé, and F. Combes **301**

MAGIC - A unique survey to probe the role of environment on galaxy mass assembly
B. Epinat, T. Contini, W. Mercier, V. Abril-Melgarejo, A. Boselli, and The MUSE GTO collaboration **303**

Resolving jet-driven AGN feedback in Centaurus A's northern filaments on a cloud-scale with ALMA
S. Flesch, Q. Salome, P. Salome, and P. Guillard **305**

Detecting variability in JWST's 'Little Red Dots' with gravitational lensing
L. Furtak **307**

Model independent test of the FLRW metric and the curvature in light of DESI DR2.
C. Millard, B. L'Huillier, C. and E. Author3 **309**

Projection effects and radial flows in barred galaxies
E. Salibur, A. Hallé, and F. Combes **313**

Revisiting the Age Scale of Galactic Globular Clusters
M. Uddin, T. Boin, L. Casamiquela, D. R. Reese, and M. Haywood **315**

Diversity of galactic discs at high redshift in cosmological simulations
M. Varma, and M. Trebitsch **319**

**Atmosph
'eres planétaires : processus physiques, couplages internes et interprétation des observations (S10)** **321**

Structure and evolution of the envelopes of hot water worlds
A. Aguichine, N. Batalha, J. Fortney, N. Nettelmann, J. Owen, E. Kempton, O. Mousis, and M. Deleuil **323**

HCN VUV absorption cross section at high temperature for warm exoplanets
A. Collado, O. Venot, B. Fleury, Z. Perrin, R. Roméo, Y. Bénilan, N. Fray, A. Jolly, X. Landsheere, S. Triquet, et al. **327**

Enseignement et Formation (S11) **331**

Astronomy outreach: Specificity of the juvenile detention environment
D. Briot, and R. Courtin **333**

Characterising lighting practises in France
R. Buhler, P. Deverchère, C. Plotard, and S. Vauclair **337**

Welcoming People with Disabilities in Science Mediation Activities: The Experience of PSTJ
P. Cruzalèbes **341**

Enabling Blind and Visually Impaired Individuals to Pursue Careers in Science
L. Petitdemange, and S. Nashed **345**

Astronomy and deafness
D. Proust **351**

At the Crossroads between Astronomy and Ecology: Exploring Links Between Urban Skyglow and Nocturnal Bird Migration
C. Villemur, J. Milli, P. Gaüzère, C. Desjonquères, B. Drillat, F. Malbet, P. Deverchère, and B. Falque **355**

Atelier de la Commission Transition Environnementale (S13) **359**

SF2A Environmental Transition Commission: Summary of the 2025 workshop
F. Cantalloube, J. Berat, N. Fargette, P. Larue, N. Pourré, S. Anderson, J. Milli, J.-F. Gonzalez, O. Berné, D. Barret, et al. **361**

Going Far Without Flying A Shared Account of a Commitment to Rail Travel
N. Fargette, M. Devinat, M. Jarry, T. Le Liboux, A. Resseguier, and Q. Taupin **367**

Environmental impacts of astronomical research infrastructures
J. Knödlseder **371**

Well-being in astrophysics (S14) **375**

A few ideas to promote inclusion
T. Paumard, A. Guilbert-Lepoutre, M. Clavel, F. Cornu, L. Petitdemange, F. Dulieu, L. Griton, and R.-M. Ouazzani **377**

Annual French workshop on well-being in astrophysics : creating a positive and inclusive work environment
N. A. Webb, J. Batut, A. Guilbert-Lepoutre, J. Foncy, M. Kwapisz, M. Knibiehler, T. Contini, L. Jouve, and G. Soucail **383**

Septi
'eme réunion des utilisateurs des télescopes français (TBL/OHP193) (S15) **389**

Measuring the redshift of ultra-diffuse galaxies candidates at OHP with MISTRAL
E. Bernaud, Junais, S. Boissier, C. Adami, H. Thuruthipilly, O. Ilbert, R. Gavazzi, C. Dubois, and W. Mercier **391**

Observations of low redshift groups and clusters of galaxies with MISTRAL at OHP.
Q. Moysan, R. Cabanac, N. Clerc, L. Paquereau, F. Sarron, and G. Soucail **395**

Specific angular momentum maps of late-type galaxies using GHASP@OHP
J. M. Pacheco-Arias, P. Amram, B. Epinat, and W. Mercier **399**

Gravito-inertial modes at the surface of Rasalhague
M. Rieutord, T. Böhm, A. Domiciano de Souza, A. Lopez Ariste, G. M. Mirouh, P. Petit, and D. R. Reese **403**

Variable Emission Lines From CGCG 077-102 NED02, An AGN Embedded In A Deep Gravitational Well Of A Rich Cluster Of Galaxies
J. Harry, K. Parra-Ramos, M. Ulmer, and C. Adami **407**

© Société Française d'Astronomie et d'Astrophysique (SF2A) 2025

HII region - Photodissociation Region interface characterisation with MISTRAL
D. Russeil, C. Adami, A. Zavagno, P. Suin, and B. Sevilla **409**

Astronomie du ciel transitoire et multi-messagers (S16) **411**

Sky Localization of Massive Black Hole Binaries with LISA: Applying Coronagraphic Time-delay Interferometry to Low-latency Searches
R. Costa Barroso, Y. Lemière, F. Mauger, and Q. Baghi **413**

Detectability and identification of massive binary black holes with NewAthena
S. Lescaudron, R. Mignon-Risse, A. Coleiro, F. Cangemi, and P.-A. Duverne **417**

Preparing for LISA with CFH telescope: Synergies between gravitational waves and electromagnetic observations
A. Perego, A. Lamberts, M. Schultheis, and N. Christensen **421**

The impact of fundamental physics in extreme core-collapse supernovae
A. Celati, M. Bugli, L. Del Zanna, and M. Obergaulinger **425**

L'interféromètre NOEMA et le télescope de 30m de l'IRAM: développements récents et futurs (S17) **427**

Failed quenching in massive spiral galaxies
R. Cologni, P. Salomé, D. Le Borgne, P. Guillard, M. Boquien, S. Flesch, L. Bouscasse, and F. Combes **429**

NOEMA Astrochemistry of Cygnus-X Protostars (NASCENT-Stars)
T. Csengeri, L. Bouscasse, D. Panda, N. Kessler, and NASCENT-stars collaboration **433**

ALHAMBRA (Advanced Large Heterodyne Array for Millimeter Band Radio Astronomy)
A. Hughes, S. Maret, P. Salomé, E. di Folco, M. Gerin, F. Gueth, K. Schuster, and S17 participants **439**

Line polarimetry at the 30m with Xpol: variability of the magnetic field around the evolved star U Her
L. Marinho, F. Herpin, H. Wiesemeyer, A. Lopez Ariste, A. Baudry, M. Montargès, P. Mathias, A. Lèbre, and A. Chiavassa **443**

Chemical constraints on the dynamical evolution of the cold core L694
A. Taillard, V. Wakelam, P. Gratier, E. Dartois, M. Chabot, J. A. Noble, and L. Chu **447**

PLATO : un nouveau regard sur les syst 'emes planétaires (S18) **451**

Thermal effects on the bulk density of rocky planets: the Earth-like composition band
A. Aguichine, F. Nimmo, N. Batalha, and J. Fortney **453**

Evolution of stellar magnetic activity: probing planet engulfment by red giants
C. Gehan **457**

Towards the confirmation of a new ultra-short period planet orbiting a M-type star
C. Gourvès, A. Strugarek, C. Moutou, J. Morin, P. Petit, A. Dyrek, S. N. Breton, R. A. García, A. F. Lanza, S. Mathur, et al. **461**

Seismic and Rotational Characterization of Stars in PLATO observation fields using Multi-Sector TESS data
D. B. Palakkatharappil, L. Borg, M. Boscq, E. Panetier, R. A. García, B. Liagre, S. Mathur, A. Serenelli, L. Bugnet, P. G. Beck, et al. **465**

Is turbulent convection the only exciting mechanism of acoustic modes in solar-like oscillators ?
E. Panetier, R. A. García, S. N. Breton, A. Jiménez, and T. Foglizzo **471**

A new Lagrangian stochastic code for stellar convection
J. Philidet, and K. Belkacem **475**

Measuring magnetic fields in the core of red giant stars with asteroseismology
M. Villate, S. Deheuvels, and J. Ballot **479**

Finding the sweet spot: Modelling of oscillating red giant binaries
I. Amestoy, D. Godoy-Rivera, P. G. Beck, M. Abdul-Masih, S. Mathur, A. Escorza, T. Masseron, J. Merc, R. A. García, and D. B. Palakkatharappil **483**

Enhanced Asteroseismic Characterization Of Red Giants With PyTADaCS-S: Application To TESS Light Curves
L. Borg, D. B. Palakkatharappil, M. Boscq, R. A. García, B. Liagre, S. Mathur, A. Serenelli, L. Bugnet, P. G. Beck, D. Godoy-Rivera, et al. **487**

At the Galactic center (S19) **491**

Detecting non-Kerr signature in Sgr A* flares with current and future instruments
N. Aimar, J. a. L. Rosa, and H. L. Tamm **493**

On the presence of a fifth force at the Galactic Center
A. Foschi **497**

X-ray Variability-Selected Sources in the Galactic Plane
R. Webbe, N. Webb, and E. Quintin **501**

Processus de transport dans les étoiles et plan 'etes : contraintes observationnelles et défis théoriques (S20) **505**

The inertial dip as a window on the convective core dynamics
L. Barrault, L. Bugnet, S. Mathis, J. S. and G. Mombarg **507**

New branch of the Tayler-Spruit dynamo in 3D numerical simulations of stably stratified stellar regions
P. Barrère, A. Reboul-Salze, P. Eggenberger, C. Rodriguez, and M. Marchand **511**

A model of magnetised and rotating convection for stellar and planetary interiors
L. Bessila, and S. Mathis **515**

Atomic diffusion: a transport process that separates chemical species
A. Hui-Bon-Hoa **521**

Transport by the Tayler instability: The importance of the numerical implementation
L. Manchon, M. Deal, C. Pinçon, L. Petitdemange, K. Belkacem, and J. P. C. Marques **525**

Exploring hydrodynamical stellar tachoclines along stellar evolution
C. Moisset, S. Mathis , and L. Amard **529**

Préparer l'Avenir : synergies entre JWST et l'ELT pour l'étude de la formation stellaire et des disques protoplanétaires (S21) **533**

© Société Française d'Astronomie et d'Astrophysique (SF2A) 2025

Disk thickness as an alternative to saturated water-ice bands for determining ice abundances in highly inclined disks
L. Martinien, G. Duchêne, F. Ménard, R. Tazaki, and K. R. Stapelfeldt **535**

Impact de la politique scientifique aux USA (Discussion) **539**

Questions on the astrophysical databases in the US
P. Drossart **541**

Author Index **545**
