

# NOEMA observations of the circumstellar environment of $\mu$ Cep

Miguel Montargès (KU Leuven, BE)  
FWO [PEGASUS]<sup>2</sup> Marie Skłodowska-Curie fellow  
&  
Ward Homan, Denise Keller,  
Nicola Clementel, Shreeya Shetye,  
Leen Decin et al.

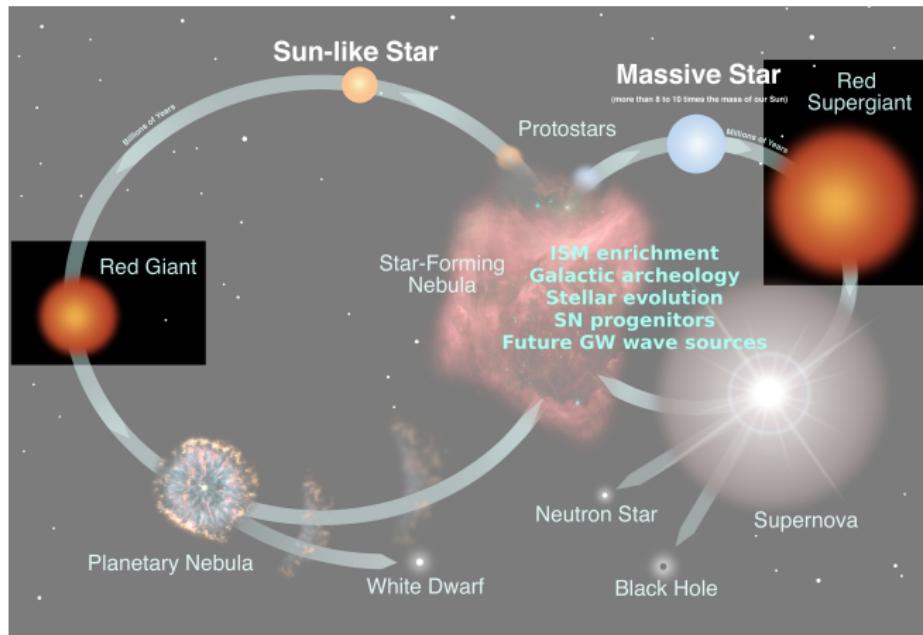

KU LEUVEN

SF2A S15  
Nice - 17th May 2019

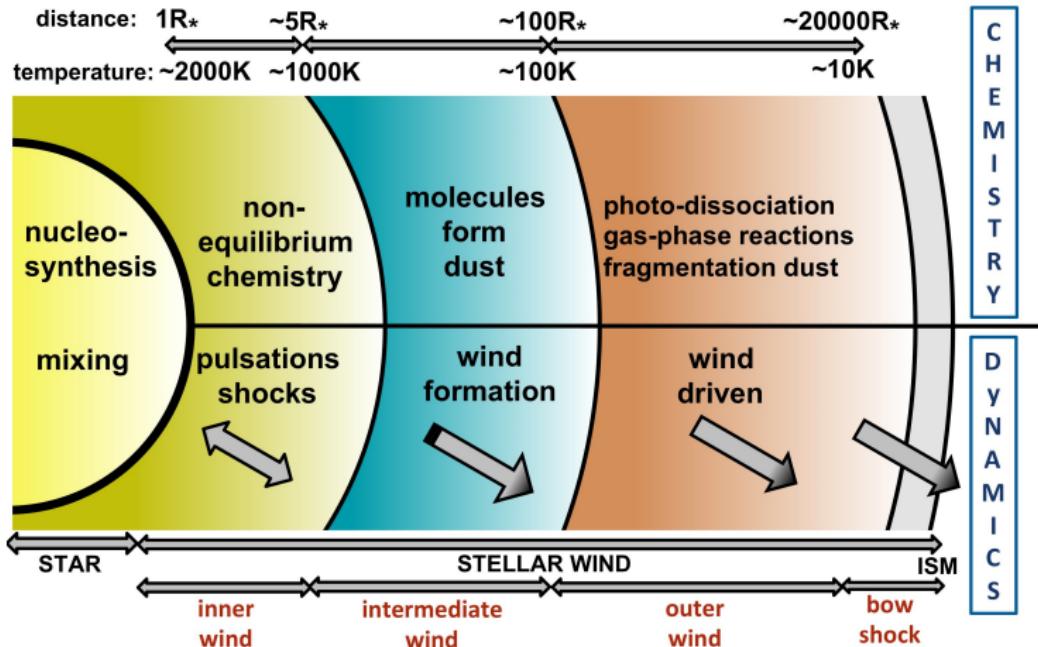

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie Grant agreement No. 665501 with the research Foundation Flanders (FWO)

# The mass loss of cool evolved stars, why ?

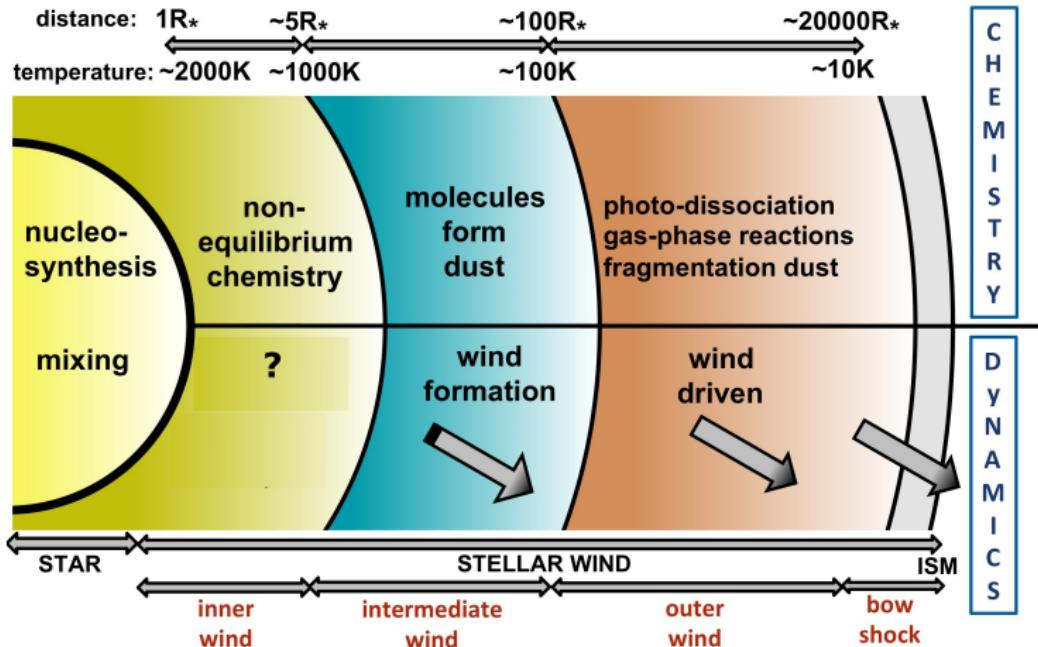

# The winds of evolved stars : general picture

## AGB stars

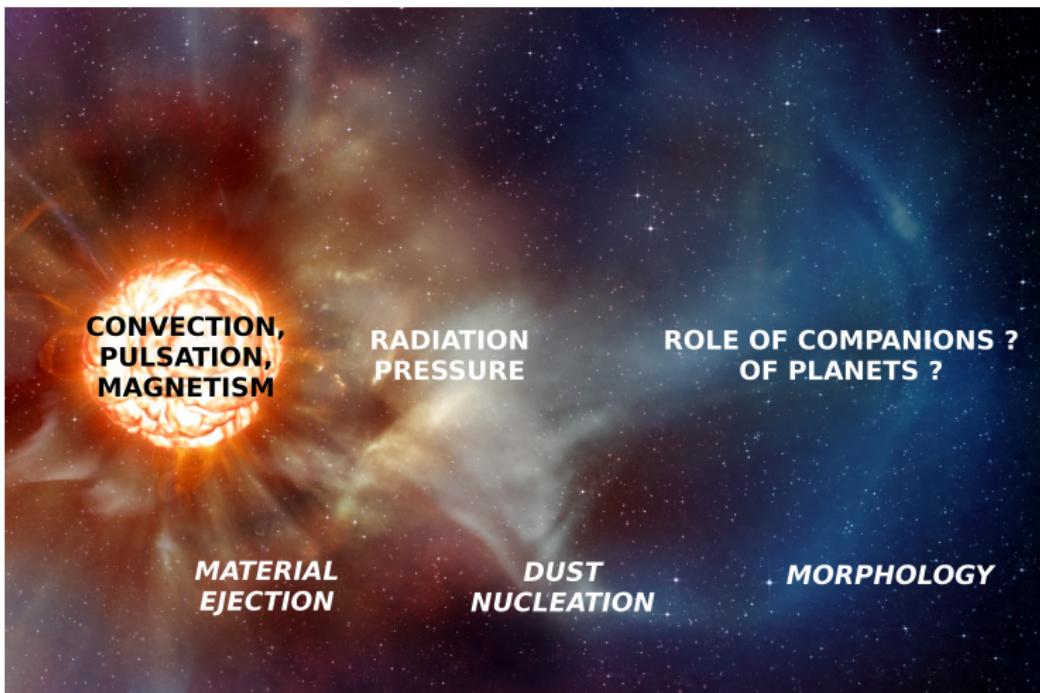

# The winds of evolved stars : general picture

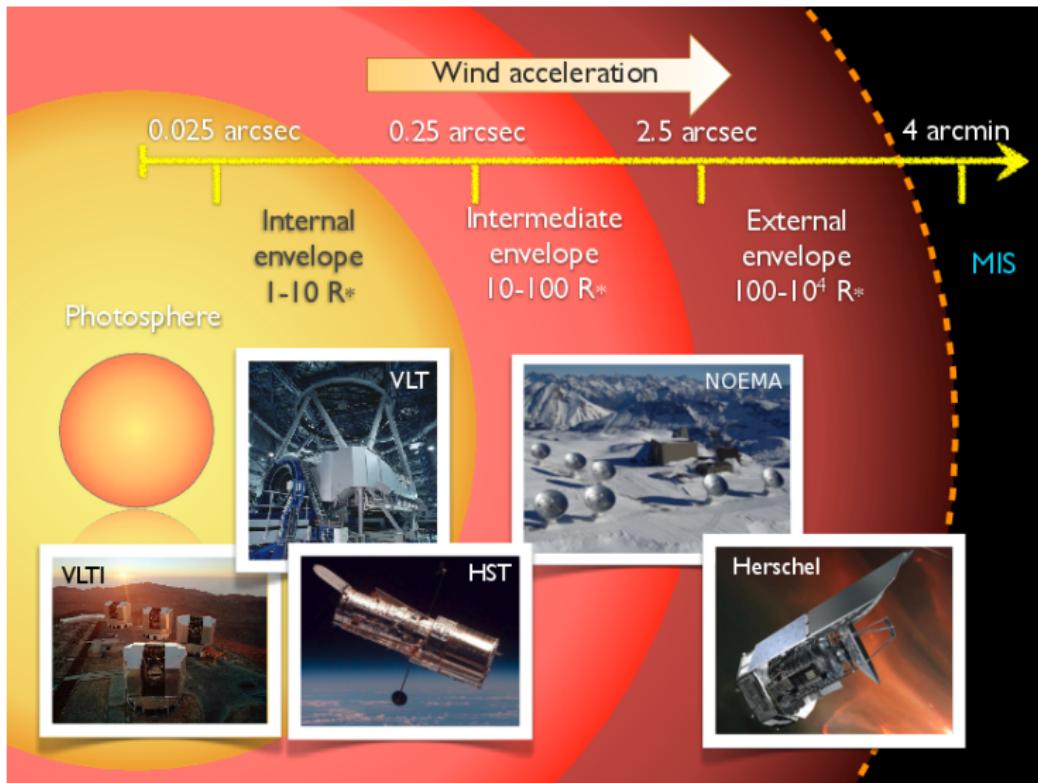

## RSG stars

# The winds of evolved stars : general picture

# Which scales ? Which techniques ?

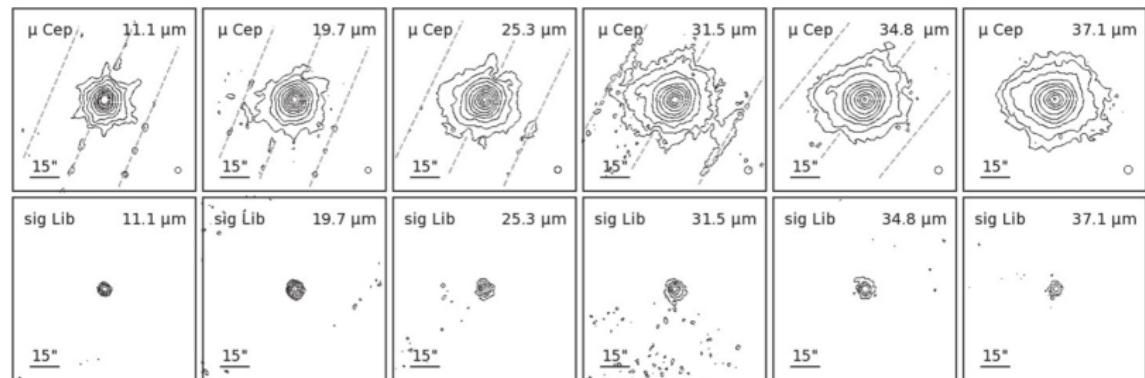

# $\mu$ Cep - Herschel's Garnet Star

Parameter	Value
d (pc)	$641^{+148}_{-144}$
M ( $M_\odot$ )	15 – 20
R ( $R_\odot$ )	$972 \pm 228$
T <sub>eff</sub> (K)	$3551 \pm 136$
Sp. type	M2-Ia

Montargès et al. 2019

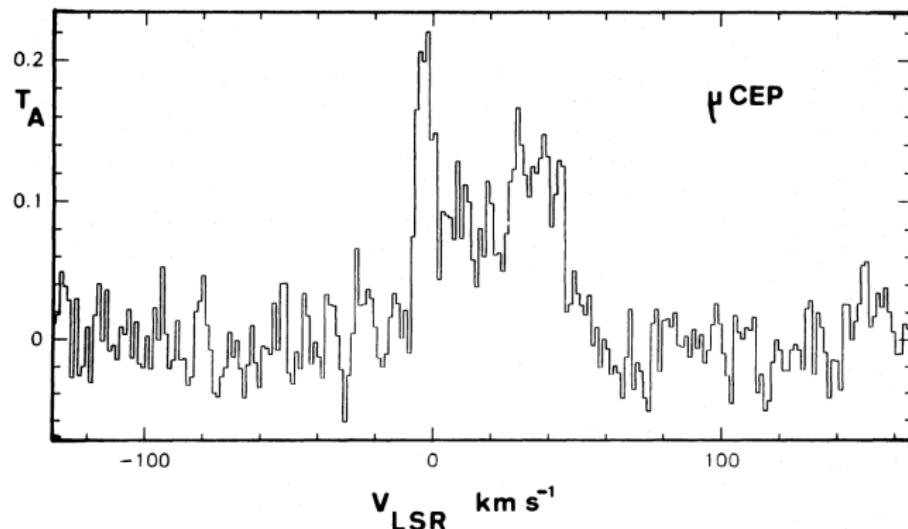

# Previous observations

SOFIA/FORECAST (Shenoy et al. 2016)

# Previous observations

Le Borgne & Mauron 1989

- Le Borgne & Mauron 1989 : several features ISM/circumstellar (radio)
- Mauron & Querci 1990 : asymmetries in NaI and KI lines (optical)

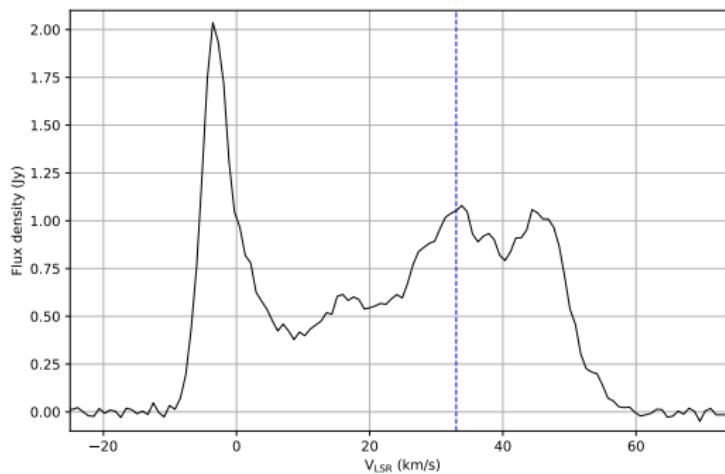

# NOEMA

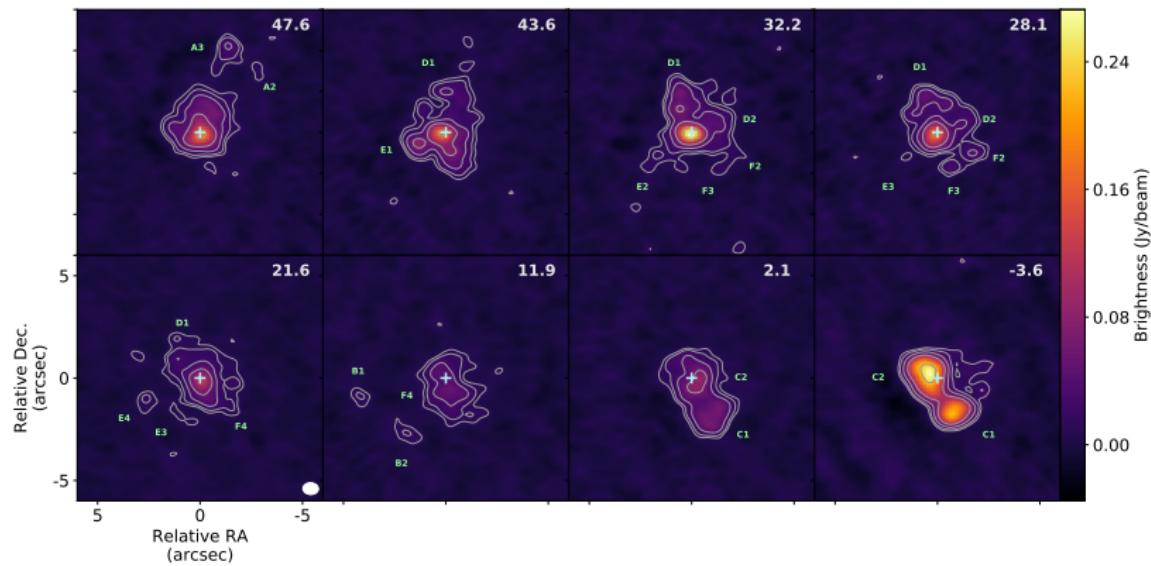

→ Characterization of the circumstellar environment

# NOEMA observations

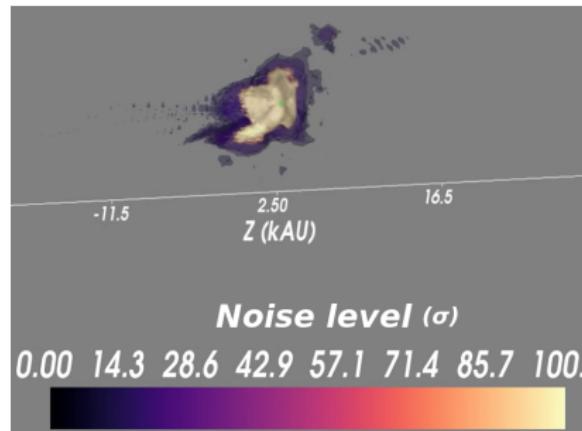

- 7B and 7C (beam =  $0.93 \times 0.70$  arcsec)
  - $\mu$  Cep, M2-Ia RSG,  $\theta_\star \sim 0.014$  arcsec ( $d = 641^{+148}_{-144}$  pc)
  - CO  $J = 2 - 1$  line (230.538 GHz)
- Montargès et al. 2019

# NOEMA observations

# Deprojection and mass loss rate estimate

(movie available at [https://frama.link/muCep\\_3D](https://frama.link/muCep_3D))

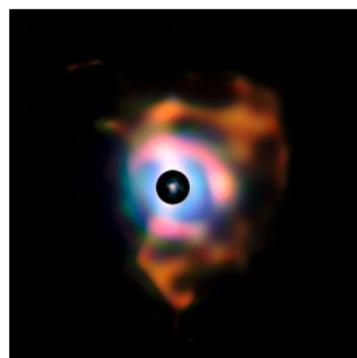

- Deprojection + radiative transfer modeling (LIME)
- Mass loss rate :  $(2.5 \pm 0.5) \times 10^{-6} M_{\odot} \text{ yr}^{-1}$
- ≥ 25% from the clumps

# Conclusions

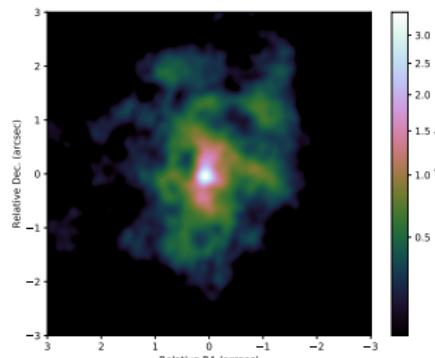

- Mass loss from  $\mu$  Cep is inhomogeneous and episodic

## Perspectives

- 3D deprojection without hypothesis
- ATOMIUM large program on ALMA

VLT/VISIR : MIR  
Dust : 2 epochs (5 yr interval)

ALMA, band 7  
Gas : speed on line of sight

Kervella et al. 2011 & Montargès et al. in prep.
